

Shaikh Javed

Data Analyst — Business Analytics — Customer Insights

+91-9768810150 shkjaved41@gmail.com linkedin.com/in/shk-javed github.com/shk-javed Portfolio

Summary

Entry-level Data Analyst skilled in SQL, Excel, and statistical analysis, experienced in data cleaning, validation, and dashboard creation to generate actionable insights, support A/B testing, and improve data integrity and decision-making within privacy-focused environments.

Skills

Programming and Data Handling: SQL • Excel • Google Sheets • Data Cleaning • Data Validation

Data Infrastructure and Engineering: ETL • Data Modeling

Visualization and BI Tools: Power BI • Tableau • Dashboard Development

Analytics and Business Skills: Statistical Analysis • A/B Testing • KPI Analysis • Data Analysis • Reporting • Business Analysis • Data Integrity • Trend Analysis • Anomaly Detection

Experience

Data Analyst Intern

MAK { Byte } · Internship · Hybrid

Aug 2025 – Present

Mumbai, Maharashtra, India

- Collected, cleaned, and validated datasets from multiple sources using **SQL** and **Excel**, improving data accuracy by **25%** and ensuring reliable inputs for reporting and analysis.
- Analyzed datasets using **SQL** and basic **statistical analysis** to identify trends and anomalies, supporting business decisions and improving operational reporting efficiency by **20%**.
- Developed dashboards and reports using **Excel** and Power BI, enabling stakeholders to monitor KPIs and improving decision-making speed by **30%** across multiple business functions.
- Supported **A/B testing** initiatives by analyzing experiment data using **SQL** and **Excel**, helping evaluate feature performance and increasing campaign effectiveness by **18%**.
- Collaborated with cross-functional teams to define data requirements and maintain data integrity standards, reducing inconsistencies by **22%** and improving overall data workflow efficiency.
- Monitored datasets related to business operations using **SQL** and **Excel**, identifying anomalies and improving reporting accuracy and timeliness by **15%** across dashboards and reports.

Projects

Customer Service Operations MIS Dashboard | SQL, Power BI, Excel | 2025

[\[link\]](#)

- Analyzed 2,000+ customer service complaint records to track operational KPIs such as complaint volume, resolution rate, open cases, and peak service hours.
- Performed SQL-based exploratory analysis to identify high-frequency issue categories, geographic hotspots, and monthly volume trends.
- Developed an interactive Power BI dashboard with executive KPI cards, trend analysis, and dynamic filters for team-level performance monitoring.
- Identified peak workload periods to support workforce planning and staffing optimization.
- Provided data-driven recommendations to improve resolution efficiency and streamline support workflows.
- Performed data validation and consistency checks to ensure accuracy of KPI reporting.
- Generated daily and weekly performance reports with trend analysis to support business decision-making.

Domestic Airline KPI Dashboard | Power BI, DAX, Data Modeling | 2025

[\[link\]](#)

- Developed an interactive Power BI dashboard using a flight dataset (9,651 records across 12 airlines) to analyze airline performance and operational metrics.
- Built KPI cards including Total Flights, Average Ticket Price, Peak Departure Hour, and Non-stop Flight percentage.
- Analyzed pricing trends across airlines using bar charts and identified top-performing and underperforming carriers.
- Created route-level insights including Top 3 cheapest and most expensive routes based on ticket price.

- Designed flight duration buckets to understand distribution of short, medium, and long-haul flights.
- Visualized source and destination distribution to identify high-traffic regions.
- Focused on operational insights such as peak departure times, route efficiency, and pricing patterns.
- Designed dashboard to simulate real-world airline decision-making scenarios.
- Implemented DAX measures for KPI calculations and ensured accurate filtering using data modeling relationships.
- Performed data cleaning and transformation using Power Query to ensure data consistency and accuracy.

Hospital Emergency Room Dashboard – Healthcare Analytics | *Excel, Power Query* | 2025 [\[link\]](#)

- Analyzed 10,000+ emergency room records including patient demographics, wait times, referrals, and satisfaction scores to define operational KPIs.
- Built interactive dashboards enabling stakeholders to identify peak load periods and improve data-driven resource planning decisions.

Certifications & Learning

- **IBM – Python for Data Science** (Mar 2026): Python, NumPy, APIs, Data Handling.
- **Power BI Workshop:** Training in business intelligence, KPI modeling, and dashboarding.
- **Introduction to Data Analytics on Google Cloud:** Certification covering data fundamentals and analytics workflows.
- **Google Analytics – Great Learning Academy** (July 2024): Successfully completed a free online course on Google Analytics.

Achievements

- **Build & Grow AI Hackathon 2.0** | GDG Cloud Mumbai & GDG Cloud Pune | NMIMS Mukesh Patel, Mumbai (Jan 2026): Led a team of 3 to develop “Maayura,” a HealthTech app for pregnancy care, designing UI/UX and integrating Google Maps API within a 24-hour sprint.
- **Google Student Ambassador:** Represented Google’s mission and organized technical and analytics-focused events.
- **Project Showcase – GDG-DevFest Mumbai:** Selected to demonstrate a personal analytics project on stage at a major tech conference.
- **Open Source Contributor – OSCG ’26:** Recognized as a contributor at Open Source Connect Global 2026.

Education

University of Mumbai

B.Sc in Data Science | CGPA: 7.40/10 (up to Semester 4)

Mumbai, Maharashtra, India

July 2023 – April 2026
